

WARRANTY CLAIM FORM & TROUBLESHOOTING

To request replacement under warranty due to manufacturer defect, a completed claim form & battery test sheet is required. Please provide all applicable information requested on this form and submit via a Support Ticket online at www.rollsbattery.com by email to support@rollsbattery.com or FAX to Rolls Technical Support Department at 902.597.8447. When a claim is received, qualified and approved by Rolls Battery Technical Support for replacement, all warranty processing and arrangements, including product sourcing and confirming any applicable shipping fees, will be facilitated by Rolls Battery Customer Service. When approved for full product replacement, re-stocking arrangements or account credit may be issued to a Rolls Battery distributor where applicable. A claim for replacement under warranty may not be approved in circumstances where the product in question is no longer available for testing, has been removed from an active system without sufficient troubleshooting, or where replacement has been issued and/or installed prior to submission and approval of the warranty claim. Contact Rolls Battery Customer Service at 1.800.681.9914 for assistance.

NOTE: IT IS NOT NECESSARY TO RETURN DEFECTIVE BATTERIES REPLACED UNDER WARRANTY UNLESS OTHERWISE INSTRUCTED.

Terminal and Case Cover Date Coding - FLOODED: The manufacture date code is a four (4) digit number embossed or engraved on the battery. It is located on the top edge of 4000 Series battery models or stamped into the negative terminal of models with flag or Montreal-style terminals. In some incidences, a date code may be noted on each battery cell. Date code may also include a 5th character, noting the operator number. For Rolls AGM & GEL products, the manufacture date code is heat stamped on the top of the battery. This code represents the year, week and day of week the battery was manufactured as outlined below:

FLOODED MODELS: 1ST = DAY OF WEEK (1-5) - 2ND AND 3RD = WEEK OF YEAR (01-52) - 4TH = YEAR (7 = 2017) **GEL MODELS:** 1ST & 2ND = YEAR 3RD & 4TH = MONTH 5TH & 6TH = DAY
AGM MODELS: "K" (1st Character) represents 2000 - 2ND & 3RD = SPECIFIC YEAR - 4TH & 5TH = WEEK OF YEAR (1-52) - 6TH & 7TH = DAY OF WEEK (1-5)

NOTE: Any additional characters are strictly factory/operator codes. If the date code is not visible, refer to the 8-digit date code printed below the model number on the product label.

BATTERY MODEL:		INSTALLATION DATE:	MM / DD / YYYY :
# BATTERIES IN SERIES:	# STRINGS IN PARALLEL:	SYSTEM VOLTAGE:	12V 24V 32V 48V

RENEWABLE ENERGY SYSTEM INFORMATION

This information is necessary to troubleshoot and confirm proper system setup and adequate charging of the battery bank. If you are unfamiliar with these details or unable to complete, please refer to the equipment manufacturer or your system installer for assistance. Battery damage or failure due to improper system setup, programming, over or undercharging, and/or adherence to manufacturer recommended charging parameters or maintenance is not covered under warranty. See Rolls Battery Warranty for full terms & conditions.
